Base POGS re-implementation (train, group, track)

✓ Done

Synthetic scene generation (54-case benchmark)

✓ Done

Gaussian + pose metrics (ADD-S, pos/rot error)

✓ Done

Object grouping visuals (object-only splats)

◐ Partial

With / without object splat comparison

✗ Not started

Tool perturbation recovery (±5° steps to 30°, KL div.)

✗ Not started

In-grasp recovery rate (target 80%)

✗ Not started

5 Hz tracking frequency

◐ Partial

2D foundation-model latency (11 models)

◐ Partial

Model substitution in train/track

◐ Partial

Env: Py 3.12 / CUDA 13 / PyTorch 2.14

◐ Partial
